

VARIOPRINT[®]

Coating of drilled holes

Hat shaped Pad

Application:

Coatings of drill holes with a depth : diameter ratio of approx. 1 : 1

Machine description:

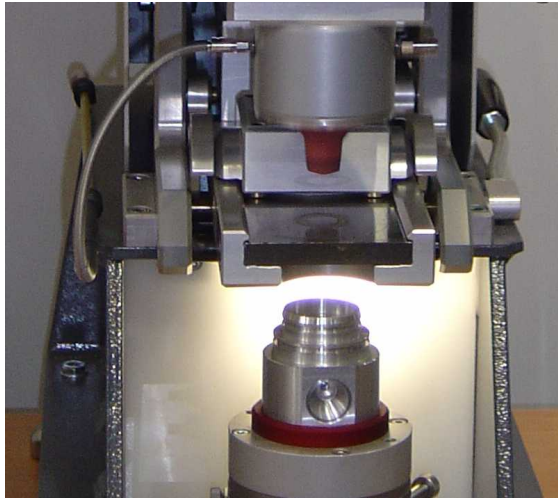

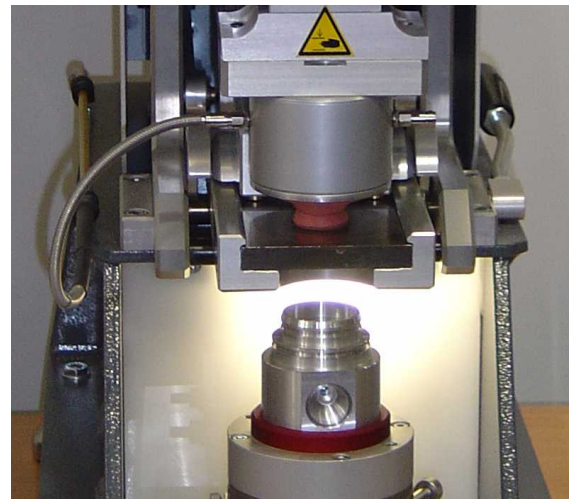

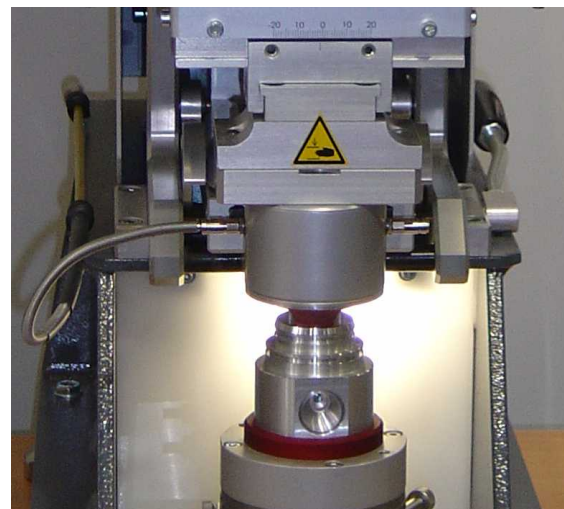

Plate moves under the hat shaped pad. The coating medium is provided in the required layer thickness.

Hat shaped pad moves onto the plate under Pressure and receives coating medium.

Hat shaped pad moves into the drilled hole to be coated and transfers the coating medium to the drilled hole wall via expansion.

Example:

Drilled hole with a diameter of 15 mm is coated with lubricant at a depth of 13mm.
